

## ForScore Sheet Music app

### Training videos and sessions for the Symposium 3.0

## General

The following curriculum outlines the training sessions for ForScore on iOS for the Gr8deas Symposium 3.0 I will provide several video recordings which you should watch prior to the actual Symposium sessions. Be aware that I cannot spend individual times during the live sessions with major issues if you haven't watched the videos and followed the instructions. Though you can reach out to me with individual questions via email at [markus.baggio@gmail.com](mailto:markus.baggio@gmail.com).

## Video Recordings

The following recordings will be shared via the Gr8ideas member site for those attending the Symposium. Supporting documents and files will be provided at the release of the recordings.

**Video #1: Stay updated** – update your iPad and forScore to the latest version and keep them updated.

**Video #2: Upload Sheet music** - I will provide some example sheet music to work within ForScore for one of the live sessions. This video will cover how to load sheet music into forScore.

**Video #3: Peripherals** - A foot pedal is essential to turn pages. I will show how to connect mine via Bluetooth to my iPad and how to use it. Using an apple pencil is optional, but helpful.

## Live Sessions

To be actively involved in the live sessions, you will need:

- iPad and forScore updated to latest version
- Optional: Foot pedal to turn pages
- Optional: Apple Pencil to highlight and mark-up
- Example sheet music loaded into ForScore (example files will be provided)

You can attend the session if you have don't have the equipment if you want to know if the solution is the right for you.

### Using ForScore to manage your sheet music

ForScore is a powerful tool to manage your sheet music, hosting thousands of individual sheet music pages and books. This session will cover the following basic topics:

- Classify music using Meta Data
- Organize performances in lists
- Mark up and highlight music

The session will be a live presentation of the capabilities including Q&A to cover your questions and also share experience between users.

## **ForScore Sheet Music app**

#### **Importing scanned PDF Sheet Music into ForScore**

This session will cover a workflow which worked for me importing sheet music to ForScore

- Scanning sheet music
- Using PDF tools to merge individual scans and pre-built Table of content
- Transfer sheet music from your computer via cloud (e.g. Dropbox)
- Import scans into ForScore

The session will be a live presentation including Q&A to cover your questions and also share experience between users.
